Wedding Specialist, the Advanced Bridal Work Course with Wally Klett

Boerma Instituut is proud to present the world famous Wally Klett diploma course for the second time.

The course is held over 3 sessions of a total of 15 days. Boerma Instituut is the only school in Holland to do so. Over these 15 days Wally will teach you her techniques in decorative wedding work to recreate her famous style of wedding floristry.

The course covers bridal bouquets, designs for bride's maids, buttonholes & jewellery, table designs and decoration of a local Church. Wally's bouquets are either wire & tape technique or stems sealed by wax etc and bound on to the frame but never hand tied. To book the course you must have several years of floristry experience this is NOT a course for beginners.

The standard of practical work on this course is in our view the highest of any in Holland. The standard is the closest you will find to a European masters practical work. Please look at any of Wally many wedding design books to see her very distinctive style of floristry. This course will put your wedding work in a different league to your competition. Whether you are a working florist or instructor this is the ultimate wedding design course available in Holland.

Of course we will give sufficient time at the examination to make the designs but practice in-between courses is very important. At the end of the course there is an examination. The candidates will have to make several of the bridal pieces learned during the course. All materials are included in the course fee except the preparation materials and the exam materials. The exam is judged by Boerma Instituut & Wally Klett. The Course code is AWBID-12.
